

## Application Form for Charities and Community Organisations

Digital Wings is a programme initiated by computer recyclers, RemarkIT Solutions, to redistribute electronic equipment from corporate entities to community organisations to enhance educational and employment opportunities.

Charities and whānau/ hapū community organisations are invited to apply for refurbished computers to support their goals and outcomes. These would be supplied free of charge.

Applications for rangatahi, youth development and education-to-employment initiatives are encouraged. All equipment is refurbished and holds a 12 month replacement-only warranty.

To register your interest fill in this form and email to [di.daniels@remarkit.co.nz](mailto:di.daniels@remarkit.co.nz)

Charity Name	Authorised Contact person	Phone	Email	Charity Physical Address No, Street, Suburb, City-code

### Further information required please:

1. What are your charity goals and intended outcomes?
2. How will the donation of refurbished computers contribute to these goals? e.g. A youth group in Tauranga set up a separate youth space and computer room for rangatahi to access the *Beating the Blues* online programme in their own safe space; a Northland health group set up community computer access so that remote patients without internet at home could communicate with doctors and access their patient portals online.
3. What sort of equipment do you need and for what purpose? (NB. **Digital Wings** does not supply individuals or personal homes)
4. What other support information do you need to achieve your intended outcomes, e.g. referral to free education, information about community grants etc?

### Please be aware that Digital Wings will require successful applicants to:

- provide a report on the difference the donated equipment is making to your organisation's goals
- have an ongoing dialogue with us should any hardware issues arise with the donated equipment
- understand that supply cannot be assured as is dependent upon corporate donation stock available.
